

~HARMLESS (12)

[English, safe, risk-free, undamaging, not dangerous, non-toxic, undisruptive, Opposite of, harmful]

- The priest was trained to recognize when the blotches of leprosy were **harmful** or benign.
- The priest must then take a look, and if the blotches in the skin of their flesh are dull white, it is a **harmless** eruption. It has broken out in the skin. He is clean. (**Leviticus 13:39**)
