- They have rejected the Law of Yehowah God and have not kept his regulations. - The Holy City is therefore equivalent in size to 144 million stadiums on its base level, but it also builds upward 12,000 times this amount for a total of 1 trillion 728 billion stadiums in total volume and each stadium is capable of holding 144,000 people. Certainly enough to hold all of the human family no matter how large it gets. It is large enough to hold 1 times ten to the 22 power of people as a convention center.
- And the city **lies** foursquare, and its length is as great as its breadth. And he measured the city with the reed, twelve thousand furlongs, its length and breadth and height are equal.
