

~LOG (40)

- The smallest liquid measure mentioned in the Bible. Talmudic evidence indicates the log to be one twelfth of a hin, or 0.014 bath. On the basis of archaeological findings, the bath is estimated to be 22 liters (5.81 gallons).
- If correct, this would give the log measure a capacity of about 0.31 liters (0.66 pints). One log measure of oil was part of the prescribed offering by a cleansed leper.
- This will become the Law of the leper in the day for establishing his purification, when he must be brought to the priest. (**Leviticus 14:2**)
- And on the eighth day he will take two sound young rams and one sound female lamb, in its first year, and three tenths of an ephah of fine flour as a grain offering moistened with oil and one **log** measure of oil. (**Leviticus 14:10**)
- And the priest must take the one young ram and offer it for a guilt offering together with the **log** measure of oil and must wave them to and fro as a wave offering before Yehowah. (**Leviticus 14:12**)
- And the priest must take some of the **log** measure of oil and pour it upon the priests left palm. (**Leviticus 14:15**)
- However, if he is lowly and does not have enough means, he must then take one young ram as a guilt offering for a wave offering in order to make atonement for him and one tenth of an ephah of fine flour moistened with oil as a grain offering and a **log** measure of oil. (**Leviticus 14:21**)
- And the priest must take the young ram of the guilt offering and the **log** measure of oil, and the priest must wave them to and fro as a wave offering before Yehowah. (**Leviticus 14:24**)
